

Installation Guide To Deploy The System

This document explains how to use the website online to be accessible by anyone.

- 1- Download the folder containing all the files (HTML, CSS, JavaScript, PHP and Images files)
- 2- Go to <https://replit.com/~> and signup/login to use your account.
- 3- On the left side, click on "My repls".
- 4- Inside "My repls", click on create new folder to make a new folder and give it any name you want.
- 5- Click on the new folder that you created.
- 6- Inside that folder, click on "New Repl".
- 7- You will be asked to choose a template. Please make sure to click on PHP Web Server as choosing HTML/CSS/JavaScript will cause issues.
- 8- Give that repl a name (Title). This title will be part of the domain by default. Make the repl public.
- 9- click on "create repl" to finally create the project.
- 10- Inside the repl, you can drag and drop all the files of the project into that repl.
- 11- Once all the files are uploaded, click on any . PHP file to view the code.
- 12- Once you see the code in the middle of the page, click on run to view the website.
- 13- A view of the website will be displayed on the right side of the screen and you will see a link generated just above it.
- 14- You can save that link and send it to anyone to view the website.
- 15- The view of the website on replit is not accurate, so to view the project properly, create a new tab and paste the link.
