

## Agile Product Backlog

Task	Description	User Story	Sprint Ready	Priority	Status	Story Points
Task 1	Request for Quotation Page	As an end user, I want to create a Request for Quotation of products I've found available on the website.	Yes	High	In progress	8
Task 2	Request for Quotation Page will add a new product to the final list of quotations	As an end user, I want to add new products to an existing RFQ (that will be listed on another page) and then submit the final version of my RFQ to the supervisor.	Yes	High	Complete	8
Task 3	Display the final list of all the products and quantities of an end user's RFQ	As an end user, I want all the items I requested for quotation to be listed on a single page so that I can have my desired items organized with their quantities.	Yes	High	Complete	5
Task 4	Updating the list of all products and quantities of an end user's RFQ	As an end user, I want to be able to remove selected items from my cart and change the quantity for selected items.	Yes	High	Complete	5
Task 5	Supplier Page provides a list of suppliers and the supplies that are provided by them, with the prices.	As a supervisor, I want to have a page to add my supplies so that end users can add them to their RFQ.	Yes	High	Complete	5
Task 6	Supervisors have access to the User List page, which contains all the information of the user, including full name, email, and submitted RFQ to revise, accept/reject	As a supervisor, I want to have information about the end user so that they receive a message if their RFQ has been rejected and also have access to their RFQs.	Yes	High	Complete	5
Task 7	Supervisors have access to the User List page, which contains all the information of the user, including full name, email, and submitted RFQ to revise, accept/reject	As a supervisor, I want to be able to add new users from the backend, edit existing user's information if needed and delete end users that wish to be removed from our procurement system.	Yes	High	Complete	5
Task 8	The SignUp page allows users and suppliers to create new account. The signup page has username (2 names are needed such as first name and last name), email, password as well as choosing if the person is a supplier or a buyer	As an end user, I want to be able to create a new account so I can initiate and submit an Request for Quotation (RFQ).	Yes	Medium	Complete	3
Task 9	The Log In page allows users to log into existing accounts. The LogIn Page has email to enter and password	As an end user, I want to log into my account so I can submit an Request for Quotation (RFQ).	Yes	Medium	Complete	3
Task 10	The Log In page allows suppliers to log into existing accounts. The LogIn Page has email to enter and password	As a supervisor, I want to log into my account so I can see all the end users' RFQs and be able to access the products in the RFQ, search products from different suppliers, and procure final prices for the RFQ.	Yes	Medium	Complete	5
Task 11	Home page of the procurement system	As an end user, I would like to have all products available to request for in my RFQ to be organized and accessible on the main page.	Yes	Medium	Complete	5
Task 12	Category list	As a supervisor, I want to have a list of the available categories, and the ability to add and remove categories, which will be displayed in the front end and seen by the end user so that the end users can see the updated available products that they can add to their RFQ.	No	Medium	In Progress	3
Task 13	Display an overview of products in an respective page separated in different categories with a "Read More" interactive option	As an end user, I want to access a specialized product page displaying available products so that I can make correct purchases for my needs.	Yes	Medium	Complete	3
Task 14	Display an overview of products in an respective page separated in different categories with a "Read More" interactive option	As an end user, I want to be able to be provided with different properties of the product such as type, size, color, etc.	Yes	Low	Complete	1
